

Submitter: Randy Wilhelm

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB1503

"It seems like" everything people do or say or think today is based on feelings rather than fact, and it's true because that's how I feel about it.

If you don't see the irony in this statement then you should not be making decisions that will effect the lives of honest law abiding citizens.

The facts are people are hurting because of bad decisions by politicians that are creating a condition that prevents the ability to pursue, life liberty and happiness and therefore drives people into depression.

Suicide rates are up because of inflation, deregulating of drugs, an education system that confuses children about sex, all problems caused by government.

The problem is not guns being used for suicide, but rather why is the government creating a condition that drives people to want to commit suicide.

Fix the problems that you as politicians have created and reduce the rate of suicide.
