

Submitter: Loretta Guzman

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: SB1555

Our State of Oregon is in a State of Emergency behind the voting in of measure 110. We the People are being harmed and it is killing people daily. Currently we have no responsibility or consequences for bad behavior or crime which is a crime to We the People. Our public safety and public health is in jeopardy daily. Quality of life has declined all around us. Take a walk in downtown Portland and you will see the open market to do as one pleases from smoking fentanyl, shooting up drugs, selling drugs right in the open, cooking rodent in an open fire that one makes, to people overdosing and death. Our streets are unsafe and open to those who are involved in this behavior or if you dare to go to one of the last standing businesses that are struggling to stay afloat as it is their only way to support their families while other businesses weren't able to and closed shop. The leaders have failed us all the way around and these amendments really are not enough. Stop allowing the decline and fall of our State.
