

Submitter: Emily Herbert

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4083

Dear Committee on Emergency Management, General Government and Veterans,
We are in a Climate Emergency on our only planet Earth. I have engaged in climate activism since retiring in 2009. Presently we need to draw down fossil fuels use by 7% a year to avoid catastrophic changes. This year we managed 2%. Continuing to attempt to profit by investment in fossil fuels is not only immoral but insane under these circumstances. It is past time to make this step of halting investment in coal, one of the worst of the fossil fuels whose use threatens life on our planet. Please give your support to life affirming action by supporting HB 4083.
Thank you for your consideration.
