

Submitter: Beth Keyser

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

I am a direct recipient of the effects of Measure 110. I live next door to a homeless shelter that is majorly full of people with addiction. I had a homeless man have anal sex with a tennis ball on a post at my front door. Measure 110 has done absolutely nothing to support this community of people. We do not need to study the effects of drug use in our state, you need to listen to the constituents and hear that they are not pleased with the outcome of Measure 110. The state has done nothing to improve the lives of the addicted. They have done more to bolster the lives of the addict. They are enslaving this population of our communities, by providing them with state money, paying for their homeless housing, not enforcing removing the criminal drug dealers from the streets, thus providing a firehose of cheap drugs flowing to them. Fentanyl is \$1.00 a pill. This is a problem. This problem was created by measure 110. You need to waste no time; you need to repeal measure 110. Find another source for your money to build treatment centers and mental health facilities. You owe it to the people of Oregon to care for all of them, the addicted, the homeless and the ones who pay your salary and pay for all the services you provide. We need drug possession to be a Class A misdemeanor.
