

Submitter: Anna Murphy

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4036

I would like to express my support for the re-criminalization of drugs, mandatory treatment or jail time, and banning public drug use. The intentions of Measure 110 were good, but it has been disastrous. We need to reimplement the law that requires people to get treatment or go to jail. I understand there is a desire to not criminalize addiction. However, this is leading to open drug usage and a lack of safety for others in the community including children. There have been so many lives lost. The fruit of this measure has been bad.
