

Submitter: Peter Blackston

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4036

You need to ban public drug use. We need some basic livability back in our neighborhoods and some incentive to move drug users into systems of care. It makes absolutely no sense that citizens have to walk by people openly doing drugs and are passed out blocking sidewalks with drug paraphernalia around them and nothing can be done about it. M110 as it is is not helping all Oregonians. Fix it by at least not allowing public drug use.

We want drug users to get the care they need, but we also need citizens who are not drug users to be listened to by their lawmakers - please give us some basic livability back to our cities in Oregon.
