

Submitter: Amanda Brown

On Behalf Of:

Committee: House Committee On Education

Measure: HB4078

HB 4078 aims to address the hurdles associated with transferring student data, particularly for those with Individualized Education Plans (IEPs) relocating between school districts. The legislation also seeks to empower school districts to optimize Medicaid billing, thereby securing essential funding for public school education. Furthermore, HB 4078 endeavors to streamline documentation and billing procedures for school-based health practitioners.

As a school-based Speech-Language Pathologist (SLP) who bills Medicaid, I advocate for reducing paperwork burdens and increasing direct service time with students. HB 4078 promises to enhance efficiency in documenting and billing for student services, ultimately benefiting both students and practitioners alike.
