

Submitter: Alice Shapiro

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4044

We all know that a large earthquake will come to Oregon that will cause massive destruction. Please support this study so responsible governments, businesses and non-profits can have enough data to plan ways to ensure safety for us all. It is actually time to act, rather than study. However, this is a necessary step--Please support and pass this bill.
