

Submitter: John Herbert

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4044

We all know that a large earthquake will come to Oregon that will cause massive destruction.

We desperately need to prepare!!! Our lives depend on this.

Please support this study so responsible governments, businesses and non-profits can have enough data and necessary information to plan ways to ensure safety for us all.

Don't accept any pressure from anyone to stop this bill. That would betray our public trust in our state legislators!
