On Behalf Of:

Committee: House Committee On Economic Development and Small Business

Measure: HB4124

I support HB 4124. Historic preservation is so incredibly important on many levels. When preserving historic sites and structures, we are keeping a part of the special fabric of our communities. Preservation allows a literal and figurative glimpse into another time, oftentimes laying our eyes upon priceless and ancient materials, like old growth timber for example. Preservation is sustainable. Restoration allows for the resources in a building to continue to be used instead of using up materials in the current market unnecessarily. History is important. Restoration is sustainable. Please distribute funds to the organizations across our state who need it to continue to do amazing restoration work. Thank you. Dana Nash
