

Submitter: Ritch Hanneman
On Behalf Of: my family
Committee: House Committee On Business and Labor
Measure: HB4080

This is one of the worst ideas to provide power. It is not wanted on the East coast and is also being investigated for causing problems with whales

It also does not pass the basic tests :

1. compared to what ?
2. how much will it cost
3. show examples that are now working where this is

successful.

Also, what are the repair costs and who tears it down the right way when it either fails or becomes obsolete.

regards
Ritch Hanneman
