

Submitter: James Marquard

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4083

I support this measure for many reasons. The one that seems pertinent here is the State's role in deciding how to invest funds. Our State's Climate goals surely must focus on the fossil fuel factor, with coal being a large contributor to and against meeting those State Climate goals. So, divesting from companies, and industries seems obvious. This bill is a step in the right direction for the State's funds, its' citizens and our Country.

Thank you,
James Marquard
