

Submitter: Howard Shapiro

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4044

We all know that a large earthquake will come to Oregon that will cause massive destruction. Please support this study so responsible governments, businesses and non-profits can have enough data to plan ways to ensure safety for us all. We must be prepared and demand that polluters be transparent about the toxins they are spewing into the air we breathe. Pollution is occurring right now and will reach very dangerous levels when the earthquake happens. Please act now.
