Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4044

I am writing in support of HB 4044. This should have been done a long time ago. The risks of toxic inhalation to a large number of Oregonians who live anywhere in the vicinity of the CEI hub in the event of a major earthquake must be identified and mitigated. Let's get this studied and get started on a plan to protect the people and the wildlife and the water and the land.

Thank you for taking my testimony.

Catherine Bax
