

Submitter: Mindy Miller

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4044

February 6, 2024

Testimony in support of the
Department of Environmental Quality to study the risks and
Issues relating to earthquake-induced inhalation.

I am extremely concerned about the dangers of gases and
toxic flumes coming from the different tanks that are in the
industrial areas of Portland. This needs immediate research.
in order to safeguard the residents of our city.

The Oregonian had an important article that I had read about
how serious and deadly it could be in the event of a 9 or 10 magnitude earthquake.

Please support passing bill 4044.

Mindy Miller
