On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4044

Submitter: Kathleen Boylan

Committee: House Committee on Emergency Management, General Government,  
and Veterans

Measure.: HB 4044

Esteemed Committee Chair Graber and members

I support HB 4044 , the Toxic Inhalation Plume Study bill. Gaining a better understanding of the real risks of the release of toxic hazardous materials and implementing mitigation is essential to protecting life. The bill will help policymakers design appropriate programs to prevent death and injury when the inevitable earthquake hits

Sincerely,  
Kathleen Boylan
