Measure 110 and the Latinx Community

The Facts

- **6% of Oregonians** are uninsured. For **Oregonians who are Latinx**, that number is **20%**, **over three times higher**.
- Nearly **3,000 Latinx Oregonians** accessed treatment in the 2022-23 fiscal year, with thousands more accessing peer support and harm reduction services.
 - **The vast majority of these slots** were only available due to funding from Measure 110.
- There is only **ONE in-patient treatment facility in the state** that provides Spanish language treatment programs.
 - **NO FACILITY IN THE STATE** is designated to provide in-patient treatment programs for state funding for the first time in **summer 2022**.
 - **The funding for Measure 110** has only just started to reach the Latinx community. A return to criminalizing addiction would jeopardize that.

The Effects

- For those jailed for unmet behavioral health needs, OHP members make up **49% of all jail bookings** and **65% of those jailed more than 4 times a year**.
- People in this category are **over 6 times more likely** to have a substance abuse diagnosis and **over 5 times more likely** to have both a substance abuse and mental health diagnosis.
- **Are we solving the addiction crisis or criminalizing people who are at the intersection of addiction and poverty?**

**WE CANNOT ARREST
OUR WAY OUT OF THE
ADDICTION CRISIS.**

**THE LATINX COMMUNITY NEEDS
REAL SOLUTIONS.**
