

Submitter: Christine Burmeister

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

If this is intended to get anti-science material into our school system, I oppose. I resent the use of the term 'anti-discrimination' to support material that discriminates against people. If folks want their kids to go to an anti-science type school that discriminates against people based on their sexuality there are plenty of them out there. Public schools should be pro-science and anti-discrimination in the truest sense.
