and World Affairs

Measure: SB1577

I OPPOSE SB1577, this bill will allow non-Americans to fraudulently vote. As a Sovereign American, I take voting very seriously and expect more stringent electoral system than we currently have. We need to update and clean voter rolls every two years. This will help to ensure that those who have moved or passed away have been removed or adjusted. Being able to vote in America is a privilege; moreover, it is a duty and shouldn't be taken lightly, as it affects every one of our fellow Americans. In light of the past few years, it is best to error on the side of righteousness. We all need to work together to create the safest, cheapest, and most secure voting system available. Our country is in turmoil with doubts and accusations. We are a UNITED nation and we need to get back to working together to protect our votes.

With that being said, we need to return to in-person and same day voting, and hand counting. This worked before and the in-person with ID in hand is more personal and gave a sense of security that we all crave for again.
