

Submitter: David Sander

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4036

The supply chain infrastructure is very well established in Portland. I support as many penalties on possession, distributing, and public use as possible. My child has seen enough. Every day on our drive to school, we see users smoking off foil, and injecting into various body parts. I am tired of explaining this behavior to her. I fear for everyone's safety with this much open use on the street. But, I fear most for our Oregon kids, who know nothing else but open, ever-present fentanyl use in, in virtually all public settings.
