

Submitter: Ken Nolley

On Behalf Of: No to criminalization

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

Addiction is a healthcare issue, not a crime. We cannot address the addiction crisis with arrests and jails, which add barriers to stable housing and increase overdose deaths. Instead our communities need more investments in treatment, including outreach teams and peer mentor programs. People need help, not handcuffs.

Research has clearly shown that the tide of homelessness due to drugs is NOT driven by decriminalization, which most street people are unaware of, but rather by the arrival of fentanyl.

Arresting and jailing people for addiction has never worked. Criminalization has inflicted decades of government harm and violence on Black and brown communities. Giving a new name to the old war on drugs won't change the results: HB 4002 will harm, not help, Oregonians.

People suffering from addiction need investments to the continuum of care. They need successful peer outreach and mobile crisis programs to help move people into housing and services. And we need law enforcement and service providers to work together to connect people to services. Oregon can do this work without making addiction a crime. This is the direction that our state should head.

I urge you to oppose HB 4002 and efforts to criminalize addiction.
