

Submitter: Jacob Carlsen

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

Discrimination of all sorts should not be permitted in the process of choosing any learning materials presented to students. Students should have free and open access to any information or material that is available. If a parent does not wish for their child to access certain materials, that should be the responsibility of the individual parent. Further, their position should not be forced upon the other children and families in their own search for desirable material.
