Measure: HB4160

I am NEUTRAL on [HB 4160].

I strongly believe in the concept of [HB 4160] but, there are mitigating factors such as the age of the student at the time of the sexual conduct.

I also strongly believe the time period, should be significantly extended, if the sexual conduct was committed with an under-aged student and for whatever reason, said conduct was not discovered within the time period prescribed in [HB 4160].

But another conundrum arises...the sexual conduct and school employee occurs when the student is underaged, the sexual conduct goes unreported and the teacher and student slip into marital bliss as soon as permitted by age of previous student.
