

Submitter: Diana Ackerman
On Behalf Of:
Committee: House Committee On Rules
Measure: HJR201

We are already paying enough in the form of taxes, raising our property taxes will hurt a lot of people and especially the lower income. Raising the property will also hurt the seniors on fixed income, they already are struggling to meet their needs. When you raise the property taxes then landlords will have to raise the rent to cover the additional costs associated with the increase and rent is already so high that so many people can't afford it. You already bring in enough money to cover the cost and making new programs to give free money to a certain group of citizens is just plain bad management. Pretty soon you won't have enough worker paying into the system to cover all the government spending, which is already out of control. We cannot support the wasteful spending that is going on. I should not be concerned about loosing my house because you can't control your needless programs that doesn't really help people, it just make more lazy people who want the free ride and not have to work. There is so many capable people who should be working but have learned the system and sponge off of the free programs. Then when someone who truly needs the help can't get it. I raised my child without the government giving me free money every time I turned around, there is no reason why people now days can't raise there children on their own. They need to learn birth control and not have any more children than they can support, so if that means they only have one, well then they only have one. It's doesn't make sense to have 5 kids with 5 different fathers and then live off the system. So you trying to take more money from people to support your dumb ideas will not help in the long run. It's not even a bandage that you are doing, just bankrupting the honest hard working people. So I highly oppose your idea to tax people more.
