

February 10, 2024

Submitter: Rebecca Read

On Behalf of:

Committee: House Committee on Agriculture, Land Use, Natural Resources and Water

Bill: HB 4049

I support this bill because it acknowledges the need to study the effects of biosolids on our Oregon communities. Knowledge is power. When we learn what are the adverse effects to the environment by this byproduct we can work to create mitigation methods to reduce long lasting harm. This is something that is within our power to do.
