

Submitter: Janice Sugar

On Behalf Of:

Committee: House Committee On Rules

Measure: HJR201

Taxes are already too high, seniors are having trouble keeping up with car and home insurance, upkeep on our homes, doctor bills medications, increases in gas, water and electricity, food as well as day to day necessary expenses. Also, my friends and I feel we don't see our tax dollars working for us. For example some pot holes are unavoidable and are ruining our tires, we can't afford to go to a ball game, a concert or even purchase an ice cream cone in the new and improved 5th Street area, who are you catering too??? Not everyday people that's for sure. It feels like every man, woman and child for themselves, very sad. When is our local government going to give back to its community instead of keep putting their hand out for more money ?? or a vote. Why doesn't

our government help seniors age in their home instead of so obviously keep contributing nails in their coffins.

No more taxes, thank you for reading.
