

Submitter: Miles Phillips  
On Behalf Of: Everyone  
Committee: Senate Committee On Judiciary  
Measure: SB1576

To all concerned, i have worked or been involved in outdoor recreation my whole life including advising communities, landowners and businesses on outdoor recreationnservices and business and benefits these opportunities and facilities provide to individual health, family well being and the economic health of communities. It is critical that there is civil liability immunity for the entities that build and manage these recreational assets like trails and the support infrastructure that goes with that including bridges, parking, stairs etc.

This temporary bill will provide time to more thoughtfully address a ling term solution. Thank you for thinking of the well being of all Oregonians and supporting this bill to protect municipalities and organizations that own and or manage trails and other recreation assets and services.
