

Submitter: Todd Vaughn  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB1583

I oppose SB1583 based on the forced inclusion of narratives pertaining to the roles and contributions of particular social groups regardless of the significance or pertinence of their presence in any given instance. Historical accounts should be objective, not skewed by required content that is considered to be "inclusive." Skin color and/or LGBTQ considerations should not be prioritized when the accomplishments of individuals are presented. If they are considered a priority consideration, then the personal accomplishments and/or contributions become secondary. This is in and of itself "racist" (or prejudice) in my estimation and is simply a divisive ploy of the "woke agendas" that already plaque our public education system. We simply need honest storytelling without political agendas.
