

Submitter: Kelley Albrecht
On Behalf Of: Self
Committee: House Committee On Rules
Measure: HJR201

Since the passage of Measure 5 in the 1990s, K-12 education has not been fully-funded. The Quality Education Commission's QEM has been ignored and underfunded every biennium since its inception. The only solution is a constitutional amendment to ensure K-12 education is funded at QEM levels.

It is a travesty that in lieu of this critical and overdue fix to the education system that is failing children--which affects them adversely for life--law enforcement is being prioritized. You all should be ashamed of yourselves. Throw this in the garbage, and get us a vote on a constitutional amendment to ensure QEM-level funding for K-12 education: Every day that you delay is harming not only our children, but our society, as they must contribute to it.
