

Submitter: Rachael Aldridge

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB1576

It has been a long understanding that those who own/care for lands that are utilized by the public are also protected should something happen on those lands. This is a stance that must be protected, if not expanded upon further as growing numbers come to the coast. Owners/caretakers of land should not fear that someone may make a misstep and now they are locked in a legal battle simply because someone wore the incorrect shoe for a surface, or they were not paying attention to their surroundings. Recreational immunity must be protected and must be afforded to all landowners and caretakers.
