

Submitter: Tricia Britton
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

I strongly oppose Senate Bill 1583. This bill blocks the rights, responsibilities and representation of local school boards to vote on the curriculum, text books and to have a say in age in appropriate material on school grounds.

This bill is disguised as protecting against discrimination when it's really advocating for over-sexualizing children and allowing the predatory agenda to dominate education. The intent of this bill is obvious...to prevent school boards from maintaining local control with the ability to remove ideologically driven content that is harmful for children.

While communities have been pushing back against this agenda, Oregon Democrats are maintaining the stance that common sense education and academics are not a priority while under educating and indoctrinating children with false ideologies, sex and porn is. This bill is incredibly disturbing given how academically Oregon continues fall and be at the bottom for academic performance across the nation. I oppose this bill.
