

Submitter: Jamie Stamberger

On Behalf  
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and  
Water

Measure: HB4059

Chair Helm, Vice Chairs Owens and Hartman, and members of the committee:

My name is Jamie Stamberger and I am a up and coming speciality seed farmer in Multnomah County. Specialty Brassica seed growing in the Willamette Valley is a vital part of our thriving small farm ecosystem here in Oregon. We are so lucky to be able to produce seeds in our region that produce millions of pounds of food the world over. It is our duty to protect the ability of our farmers to grow vegetable seeds, feeding their families through viable farm businesses, and the world through the food the seeds produce. I am writing to you to express support for HB 4059-7. I strongly oppose HB 4059-8.

I care about seed farming in the Willamette Valley Protected District because we must protect the independence of being able to save our own un-compromised seed as a matter of income security and disaster resilience. Good governance requires a long-view, and in this case, balancing short-term economic interests in service of long-term economic freedom and ability to grow food in a rapidly changing world.

I am grateful for the work of the committee, the named isolation districts and the limitation of GE canola in the WVPD. We urge you to remember what Oregon's seed growers bring to the table through the farming they enable, the rural economies their farms participate in, the crucial knowledge they hold and the need for food security through seed security. This proposal already represents a huge compromise for the seed growers and we cannot afford to lose any more ground. When you consider HB 4059, please listen to the guidance of specialty seed growers and support the strongest possible option for Oregon.

Sincerely,

Jamie Stamberger
