

Submitter: Marc Buxton

On Behalf  
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal  
and World Affairs

Measure: SB1548

I strongly support SB 1548 if for no other reason than it is ridiculous to have to change all the clocks in the house, barn, shops, cars and trucks and wristwatches twice a year. After spending time living in one area of time, by changing the clocks by an hour it takes a period of time for ones body to adjust, especially as you get older. In the spring the school kids are actually catching the bus an hour earlier in the morning in the dark with people on the road hurrying to work which can be dangerous for the kids. True on Standard time they get home in nearly dark but they are more fully awake than they may be in early morning and more aware of perceived danger. I support SB 1548. Thank you.
