

Submitter: Annette Beiderwell

On Behalf
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1548

Why change the time twice a year? It's ridiculous and unnatural to our human rhythms. Do the birds or animals change their habits? No, they work with nature instead of against it. Even the time that we are born is subject to checking to see if the time of birth was standard time or daylight savings time. It's an unnecessary complication and just one more thing we have been forced into accepting as part of life. Let's simply live instead of complicating and manipulating our precious asset of time. I support SB1548.
