

I fully oppose HJR201. Oregon is already ranked among the highest taxed states when it comes to income and property taxes. Our taxes shall not be raised due to past and present politicians misappropriating our existing tax dollars.

Furthermore, the government should not be putting housing quotas on states, counties, or cities. Developers should be building homes. Not governments. Governor Koteks wish of 36000 new homes a year is ridiculous. Further taxing the citizens of our great state will not solve any issues. But will cause us to become more like California. Buried in debt. Take a lesson from their poor misguided policies. This bill shall not pass. The people demand it.
