

Submitter: Terry Beilke

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

I oppose SB1583

Looking to the future, if the Republicans win the legislature, then they could require different books, then if the Democrats win the legislature back, they would require different books. This could turn into a political ping pong ball costing a lot of money for new books every few years .

I have a novel idea, try teaching reading, writing and arithmetic.

The legislature should be ashamed that the education of kids in Oregon is ranked as low as 49 th out of 50 states.

Why do you not trust your local community citizens?

Let the local communities decide .
