

Submitter: ELAINE LAVINGTON

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1559

I VOTE NO ON SB 1559 It doesn't matter what you change "global warming" to. I am 66 years of age. The climate has always been changing the 66 years I have been alive. Some years it's hotter, some year's it's colder; some year's there is less rain and some year's there are more rain. Changing "global warming" to "climate change" does not give you more rights to enact emergency powers. It's an agenda to control people's lives; it is not a threat to our planet.
