

Submitter: Sue Craig

On Behalf Of: Myself

Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure: HB4090

This bill could possibly allow for Small Nuclear Reactors. We must NOT supersede the wonderful Ballot Measure 7 that was passed in 1980. It provided for oversight by the Energy Facility siting Council. The conditions stated in the Ballot measure were for radioactive waste that would be produced to be disposed of by a licensed plant operated by an agency of the Federal Government with terminal disposition of this waste. The Measure also required a vote of the people of Oregon to agree on the waste disposal by way of certification of a site. Please do not vote in favor of this bill. Like bills are put forth every session by this industry who claim they have new ways to do the whole thing. They do not. Plus, we have NO idea what Oregon will look like in 10,000 years, which is what it takes for radioactive waste to become inactive. Thanks for your consideration of this difficult issue. Sue Craig.
