

Submitter: Tracy Williams
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

I was a high school teacher in Clackamas County. Teachers don't have time to build these ideologies into their class rooms. These are things that parents should be in charge of - not schools. If you want our state to have educated students, we need to be using our time for academics that matter for knowledge and not political agendas. I have seen paradigm shifts over the years in Oregon's education and none of them have worked. Do you remember CIM and CAM? The state made all of the teachers learn is preposterous evaluation process, spent millions educating teachers in workshops and upending our classrooms with this new agenda and for what? Nothing. It was a total waste, it didn't last and this bill is another attempt to pollute education with nonsense.
