

Submitter: Bill Mason

On Behalf
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1548

I would request that you support this bill and move it out of committee and to the floor for vote. The establishment of using only PST benefits along with a normalized time standard clearly outweighs the disadvantages of twice yearly time changes caused from switching to and from PDT. These 'time changes' negativity impact our children and businesses with unneeded burdens. It is not human nature to make these type of changes. Medical studies clearly show that they are a deterrent to peoples physical and mental well being. Please help stop the foolishness of the use of daylight savings time.

Thank You
