

Submitter: Carol Neumann
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

It is pure and simple, taking the responsibility of parents and local school boards to address and meet the needs of those in their schools and give it to a "surrogate" group is wrong and destructive to individuals and groups. Every family, school, city or town has unique needs and flavors. By putting the decision making into the hands of "third hand surrogate" decision makers not only destroys incentives for personal responsibility but also produces people who cannot think for themselves or make moral and ethical decisions. I oppose everything about SB 1583 because it is impossible to produce better decisions for the many by giving it to a few surrogate decision makers who are disconnected to each individual family, district or town.
