

Submitter: Samantha Pierson

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

This bill is important so that all people are represented in our children's learning material. All students need to see themselves represented in school materials and library books not just the majority or what some might deem "normal". The only way to combat these irrational fears about people who are different from oneself is to learn. Please support the passage of this bill.
