

I support SB1583.

I am an elementary school Teacher Librarian who strongly believes that the books in my library should reflect all of my students. I choose my materials carefully, based on reputable reviewing sources, and make sure they are age appropriate. My mission is to create a safe space, and to provide support and information, for everyone. Censorship only adds to the divide in our country today. Parents have the right to determine what their own children read, but they don't have the right to determine what all children read.
