Some BODIES have these the Middle Parts

Some penises are not circumcised
A lot of times people with these parts are boys, but any gender and kid can have any type of body.

Some BODIES have these the Middle Parts

A lot of times people with these parts are girls, but any gender and kid can have any type of body.

Our Names, Genders, and Pronouns

Kx2 Learning

Gender!

Gender is like outer space because there are as many ways to be different genders as there are stars in the sky! Each person is different and that is cool!

There are many genders!

Some people are boys

Some people are girls

Some people are nonbinary, which means they are not a boy or a girl. They are just a person.

Some people are still figuring out their gender!

5-YEAR-OLDS

Kindergarten ... "Some are not BOYS or GIRLS."

OREGON

Comprehensive Sex Education curriculum for Kindergarten in every public school. Teachers are instructed not to use the words male/female/boys/girls. Only "Person with a penis" and "Person with a vulva".

Are you blushing yet? I am. My name is Ginger Larcom and I am a licensed elementary teacher in Oregon. There's no way that I could join this profession in Oregon, knowing that the ODE mandates Comprehensive Sex Education in every public school, every grade, every subject, every year.

CSE pushes radical gender and sexual ideology on children beginning in kindergarten. The curriculum is inspired by Planned Parenthood and it aims to change traditional sexual and gender norms in society.

Conrad Woodall is a forensic psychologist. He has studied the behaviors of serial killers, rapist and child molesters. He is also studied Piaget's work regarding cognitive development of 5 to 7-year-olds. He has learned that they lack the ability to understand abstract concepts. They are concrete thinkers. Gender-neutral play is common, but they learn social norms from modeling and observational learning. Children love to please adults so will often go along with whatever an adult tells them is truth. To confuse kinders about their gender creates fear in them. And when we take away the innocence of a young child, the behaviors will follow. They will talk excessively about sexuality and may explore sexually before it is age appropriate.

Children also have a natural intuition, a small voice that will alert them if somethings not right, and could lead to danger. Teaching advanced sexual exploits and ideologies normalizes these behaviors, and therefore destroys the child's ability to sense dangerous overtures from adults, so this subjects them to grooming. In summary, grooming strategies used by molesters are now being called "education".

SB 1583 strips school boards from protecting children from dangerous curriculum and sexually inappropriate pornography in the school libraries. Please protect the children and vote no on SB 1583.

Thank you,

Ginger Larcom
