

Submitter: Joseph Budge

On Behalf Of:

Committee: Senate Committee On Natural Resources and Wildfire

Measure: SB1590

There is no empirical evidence or peer-reviewed study that links the current restrictions to having any positive effect on fish populations. Wake sports largely take place in the summer, outside of key migratory or spawning months. Studies show that wake boats waves, when operated at least 200 feet from shore, do not carry enough energy to have a significant impact on most shorelines.
