Measure: HJR201

Saw this exact even 30 y ars ago in Arizona when the Californians started flooding Arizona because of their most reasonable real estate. Within 5 years, my property taxes went from \$780/yr to \$1900/yr. DMV fees and housing prices more than doubled.

This event is now a cancer in Oregon, not so wealthy Californians who made windfalls on their real estate have conveniently moved their artificial wealth to Oregon. Oregonians cannot bare this financial burden. Developers land grabbing have priced out most affordable properties/housing. STOP THIS NOW.
