

Submitter: K Davis

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1559

I am writing to express my support of SB 1559, which will help facilitate continued climate progress in Oregon by strengthening our long-outdated state greenhouse gas reduction goals to align with the best available science. SB 1559 will update Oregon's climate goals, targeting emissions reductions of at least 45% below 1990 levels by 2030, at least 70% by 2040, and at least 95% by 2050.

Oregon has unique abilities to sequester carbon through its forests, fields, marshes, soils, seas and other natural resources. It is time to marshal these resources to the full extent possible to address the ever worsening impacts of climate change.

Please vote yes on SB1599,
