

Submitter: K Davis

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1530

I am writing in support of SB 1530 which will help families obtain and retain housing. We must step up efforts to reduce exposure to toxins including mold, lead, and radon. Energy efficiency upgrades save money and create healthier living environments.

SB 1530's benefits are comprehensive. It leverages local governments, nonprofit organizations, housing authorities, and tribal nations. We need this bill to pass. Thank you.
