

Submitter: Roxanne Dalton  
On Behalf Of: Climate Modernization Targets  
Committee: Senate Committee On Energy and Environment  
Measure: SB1559

We need immediate climate emissions reductions to limit global warming now. I am 67 years-old and like my age 60+ counterparts I have witnessed exponential damage to the environment caused by the climate crisis. SB 1559 will update Oregon's climate goals, targeting emissions reductions of at least 45% below 1990 levels by 2030, at least 70% by 2040, and at least 95% by 2050. I am very disappointed that this bill is not moving forward and I urge you to reintroduce SB 1559.
