

Submitter: Chris Mitchell

On Behalf Of:

Committee: Senate Committee On Natural Resources and Wildfire

Measure: SB1590

Once again this Committee has continued the disreputable pattern of allowing unqualified protagonists to supply irrelevant and misleading unverified information (Dragon boats on the lower , home owners with unverified complaints who do not live in the effected areas and more) to further sway a committee that admits it had neither the time , resources nor inclination to provide a fair and balanced procedure.

There have been zero relevant studies produced here.

Instead they have chosen to take the low road and provide the easy answer for those they wish to please.

I would like to know the process for complaint and which officials will be responsible for accepting the responsibility for the reverse condemnation suits likely to be brought due to this negligence?
